GUIDELINES FOR AUTHORS

The Journal of Adhesive Dentistry is a bimonthly journal that publishes scientifically sound articles of interest to practitioners and researchers in the field of adhesion to hard and soft dental tissues. The journal publishes several types of peer-reviewed original articles:

1. **Clinical and basic science research reports** – based on original research in adhesive dentistry and related topics.
2. **Reviews topics** – on topics related to adhesive dentistry.
3. **Short communications** – of original research in adhesive dentistry and related topics. Max. 4 printed pages, including figures and references (max. characters 18,000). High priority will be given to the review of these papers to speed publication.

**Invited focus articles** – presenting a position or hypothesis on a basic science or clinical subject of relevant related topics. These articles are not intended for the presentation of original results, and the authors of the articles are selected by the Editorial Board and the commentators on it are published in sequence in the same issue of the Journal.

**Invited guest editorials** – may periodically be solicited by the Editorial Board.

**Proceedings of symposia, workshops, or conferences** – covering topics of relevance to adhesive dentistry and related topics.

Experimental procedures in humans and animals. The Journal endorses the principles embodied in the Declaration of Helsinki and insists that all investigations involving human beings reported in articles in the Journal be carried out in conformity with these principles and with similar principles such as those of the American Physiological Society, eg, see J Neurophysiol 1997;78(6). In the case of animal experiments reported in the Journal, these should also conform to these latter principles or with analogous principles such as those of the Canadian Council on Animal Care or The International Association for the Study of Pain. In articles reporting experiments involving surgical procedures on animals, the type and dosage of anesthetic agent used must be specified in the Materials and Methods section, and evidence must be provided that anesthesia of suitable grade and duration was achieved. Authors reporting on their experimental work in humans or animals should also cite evidence in the Materials and Methods section of the article that this work has been approved by, respectively, an institutional clinical/human experimentation panel or an institutional animal care and use panel (or equivalent). The editor-in-chief and associate editors are expected to refuse articles in which there is no clear evidence that these principles have been adhered to, and they reserve the right to judge the appropriateness of the use of human beings and animals in experiments reported in articles submitted to the Journal.

Signature of each author required in the same order as on the manuscript title page (Fax signatures, multiple forms are acceptable). For more than 5 authors, use an extra sheet.
