1. **Clinical and basic science research reports** – based on original research in adhesive dentistry and related topics

2. **Reviews** – on topics related to adhesive dentistry

3. **Short communications** – of original research in adhesive dentistry and related topics. Max. 4 printed pages, including figures and references (max. characters 18,000). High priority will be given to the review of these papers to speed publication.

4. **Invited focus articles** – presenting a position or hypothesis on a basic science or clinical subject of relevant related topics. These articles are not intended for the presentation of original results, and the authors of the articles are selected by the Editorial Board.

5. **Invited commentaries** – critiquing a focus article by addressing the strong and weak points of the focus article. These are selected by the Editorial Board in consultation with the focus article author, and the focus article and the commentaries on it are published in sequence in the same issue of the Journal.

6. **Invited guest editorials** – may periodically be solicited by the Editorial Board.

7. **Proceedings of symposia, workshops, or conferences** – covering topics of relevance to adhesive dentistry and related topics.

8. **Letters to the Editor** – may be submitted to the editor-in-chief; these should normally be no more than 500 words in length.

**GUIDELINES FOR AUTHORS**

The Journal of Adhesive Dentistry is a bi-monthly journal that publishes scientifically sound articles of interest to practitioners and researchers in the field of adherence to hard and soft dental tissues. The Journal publishes several types of peer-reviewed original articles:

- **Letters to the Editor**
- **Proceedings of symposia, workshops, or conferences**
- **Invited focus articles**
- **Invited commentary**
- **Invited guest editorials**
- **Provisionals of symposia, workshops, or conferences**

**MANUSCRIPT PREPARATION**

- **The Journal** will follow as much as possible the recommendations of the International Committee of Medical Journal Editors (Vancouver Group) in regard to preparation of manuscripts and authorship (Uniform requirements for manuscripts submitted to biomedical journals. Ann Intern Med 1997;126: 3647).

- **Title page:** The first page should include the title of the article (descriptive but as concise as possible) and the name, degrees, job title, professional affiliation, contribution to the paper (e.g., idea, hypothesis, experimental design, performed the experiments in partial fulfillment of requirements for a degree, wrote the manuscript, proofread the manuscript, performed a certain test, consulted on and performed statistical evaluation, contributed substantially to discussion, etc.) and full address of all authors. Phone, fax, and e-mail address must also be provided for the corresponding author, who will be assumed to be the first listed author unless otherwise noted. If the paper was presented before an organized group, the name of the organization, location, and date should be included.

- **3-8 keywords.**

- **Structured abstract:** Include a maximum 250-word structured abstract (with headings: Purpose, Materials and Methods, Results, Conclusion).

- **Introduction:** Summarize the rationale and purpose of the study, giving only pertinent references. Clearly state the working hypothesis.

- **Materials and Methods:** Present materials and methods in sufficient detail to allow confirmation of the observations. Published methods should be referenced and discussed only briefly, unless modifications have been made. Indicate the statistical methods used, if applicable.

- **Results:** Present results in a logical sequence in the text, tables, and illustrations. Do not repeat in the text all the data in the tables or illustrations; emphasize only important observations.

- **Discussion:** Emphasize the new and important aspects of the study and the conclusions that follow from them. Do not repeat in detail data or other material given in the Introduction or Results section. Relate observations to other relevant studies and point out the implications of the findings and their limitations.

- **Acknowledgments:** Acknowledge persons who have made substantive contributions to the study. Specify grant or other financial support, citing the name of the supporting organization and grant number.

- **Abbreviations:** The full term for which an abbreviation stands should precede its first use in the text unless it is a standard unit of measurement.

- **Trade names:** Generic terms are to be used whenever possible, but trade names and manufacturer should be included parenthetically at first mention.

- **Clinical Relevance:** Please include a very brief (2 sentences or 3 lines) clinical relevance statement.

**REFERENCES**

- **All references must be cited in the text, according to the alphabetical and numerical reference list.**

- **The reference list should appear at the end of the article, in alphabetical and numerical sequence.**

- **Do not include unpublished data or personal communications in the reference list.**

- **Do not cite references parenthetically in the text and include a date.**

- **Avoid using abstracts as references.**

- **Provide complete information for each reference, including names of all authors.**

Upon acceptance, high-resolution digital image files must be sent via one of the following ways:

1. As an e-mail attachment, if the files are not excessively large (not more than 10 MB), to our production department: steinbrueck@quintessenz.de

2. Online File Exchange Tool: Please send your figures with our Online File Exchange Tool. This web tool allows you to upload large figures (> 350.0 MB) to our server. Please archive your figures with a maximum size of 350 MB first. Then upload these archives with the following link: http://files.qvnet.de/JAD/. password: IAD. Please name the archive with your name and article number so we can identify the figures.

**TABLES**

- Each table should be logically organized, on a separate sheet, and numbered consecutively.

- The title and footnotes should be typed on the same sheet as the table.

**MANDATORY SUBMISSION FORM**

The Mandatory Submission Form, signed by all authors, must accompany all submitted abstracts before they can be reviewed for publication. Electronic submission: scan the signed form and submit as JPG or TIF file.

**PERMISSIONS & WAIVERS**

- Permission of author and publisher must be obtained for the direct use of material (text, photos, drawings) under copyright that does not belong to the author.

- Waivers must be obtained for photographs showing persons. When such waivers are not supplied, faces will be masked to prevent identification. For clinical studies the approval of the ethics committee must be presented.

**PAGE CHARGE**

The first 8 printed pages in an article are free of charge. For excess pages, the charge is €10 each printed page. The approximate number of characters on a printed page is approximately 6,800. Please also consider the number and size of illustrations.
MANDATORY SUBMISSION FORM

Title of article: ____________________________________________________________

A signature below certifies compliance with the following statements:

Copyright transfer. In consideration of the acceptance of the above work for publication, I do hereby assign and transfer to Quintessence Publishing Company all rights, title, interest in and copyright to the above-titled work. This assignment applies to all translations of said article as well as to preliminary display/posting of the abstract of the accepted article in electronic form before publication. If any changes in authorship (order, deletions, or additions) occur after the manuscript is submitted, agreement by all authors for such changes must be on file with the Publisher. An author’s name may be removed only at his/her request.
(Note: material prepared by employees of the US Government in the course of their official duties cannot be copyrighted.)

Author responsibilities. I attest that:
The manuscript is original work without fabrication, plagiarism, or fraud;
The manuscript is not currently under consideration elsewhere and the research reported will not be submitted for publication elsewhere unless a final decision is made by the Journal that the manuscript is not acceptable;
I have made a significant scientific contribution to the study and I am thoroughly familiar with the primary data outlined in the manuscript;
I have read the complete manuscript and take responsibility for the content and completeness of the final submitted manuscript and understand that if the manuscript, or part of the manuscript, is found to be faulty or fraudulent, I share responsibility.

Conflict of interest disclosure. All institutional or corporate affiliations of mine and all funding sources supporting the work are acknowledged. Except as disclosed in the separate enclosed letter, I certify that I have no commercial associations (eg, consultancies, patent-licensing arrangements, equity interests) that might represent a conflict of interest in connection with the submitted manuscript (letter attached).

Experimental procedures in humans and animals. The Journal endorses the principles embodied in the Declaration of Helsinki and insists that all investigations involving human beings reported in articles in the Journal be carried out in conformity with these principles and with similar principles such as those of the American Physiological Society, eg, see J Neurophysiol 1997;78(6). In the case of animal experiments reported in the Journal, these should also conform to these latter principles or with analogous principles such as those of the Canadian Council on Animal Care or The International Association for the Study of Pain. In articles reporting experiments involving surgical procedures on animals, the type and dosage of anesthetic agent used must be specified in the Materials and Methods section, and evidence must be provided that anesthesia of suitable grade and duration was achieved. Authors reporting on their experimental work in humans or animals should also cite evidence in the Materials and Methods section of the article that this work has been approved by, respectively, an institutional clinical/human experimentation panel or an institutional animal care and use panel (or equivalent). The editor-in-chief and associate editors are expected to refuse articles in which there is no clear evidence that these principles have been adhered to, and they reserve the right to judge the appropriateness of the use of human beings and animals in experiments reported in articles submitted to the Journal.

Signature of each author required in the same order as on the manuscript title page (Fax signatures, multiple forms are acceptable). For more than 5 authors, use an extra sheet.
